Re: FDA/AAFCO Set to Remove
Animal Supplements from Sale

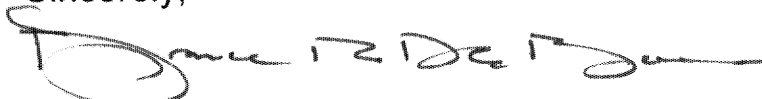

Dear Senator Hillary Rodham Clinton,

I am an animal health care practitioner who uses complimentary medicine to assist pet owners in restoring their animals to health. I use only herbs and nutraceuticals along with diet to accomplish these objectives. Instead of spending unnecessary time trying to tell you of the "unproven benefits" of these supports, I am instead sending you photographs of one of our many client's animals who in twenty seven days made this visible progress. This is typical of what we are able to do without the use of invasive pharmaceuticals.

If you have animals of your own or are an animal lover, please vote against the proposal to ban the sales of these natural supports.

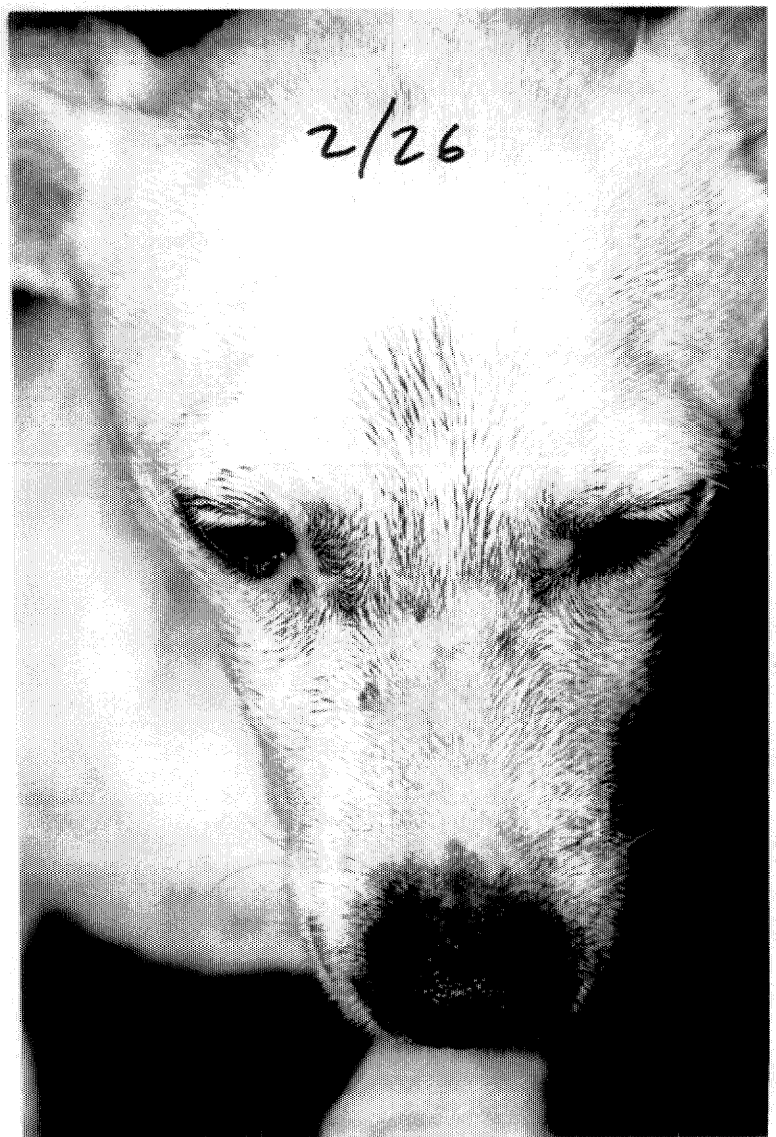

I invite you to call me if you would like more details or information concerning the various pathologies that we have been successful in remedying through natural means.

Sincerely,

Dr. Bruce R. DeBaun
